

The Chair will not at this point determine whether the resolution constitutes a question of privilege. That determination will be made at the time designated for consideration of the resolution.

Ms. CARSON of Indiana. Mr. Speaker, I ask to be heard at the appropriate time on the question of whether this resolution constitutes a question of privilege.

The SPEAKER pro tempore. The gentleman will be notified of the time so designated.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. TIBERI). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Ms. ROS-LEHTINEN) is recognized for 5 minutes. (Ms. ROS-LEHTINEN addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GREEN) is recognized for 5 minutes.

(Mr. GREEN of Texas addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PAUL) is recognized for 5 minutes.

(Mr. PAUL addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. FILNER) is recognized for 5 minutes.

(Mr. FILNER addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

CELEBRATING THE MINNESOTA TWINS AND 3M

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. GUTKNECHT) is recognized for 5 minutes.

Mr. GUTKNECHT. Mr. Speaker, today we would like to talk about a couple of issues that are very important to those of us from Minnesota. One is, of course, what is happening out in Oakland right now and a tremendous story, and I would like to yield to my friend also from the State of Minnesota (Mr. KENNEDY) to talk a little bit about what is happening in Oakland and what happened this year to a Minnesota team that was not supposed to be playing baseball this year.

I would yield to my friend from Minnesota.

Mr. KENNEDY of Minnesota. Mr. Speaker, I appreciate the gentleman yielding to me.

We have some great baseball going on in Minnesota. I attract the attention of this House that it has only been about a year since Major League Baseball Commissioner Bud Selig announced their decision to contract baseball, which would have been painless for the owners, but would have been very painful for Minnesota, and here we have in that year since a team that has come forth. Not only is this a team that was on the verge of extinction, but this is a team that has a lot of young, fresh-faced players and a cumulative salary that is amongst the lowest in the league.

We have got a great team that is out there scrapping, making all Minnesotans proud. I know my two sons, daughters and our family have always enjoyed the great baseball tradition. I have got my Minnesota Twins hat here. I do not know if I am allowed to sing We Are Going to Win, Twins Are Here, but we in Minnesota are very proud of what the Twins have been doing, and we just want to congratulate them on their success and tell them that we are confident that they are going to have a great way all the way to the World Series and beyond.

Mr. GUTKNECHT. Mr. Speaker, reclaiming my time, it is a Cinderella story, and 1 year ago it looked as if that team would not even exist this year, and now here they are in the playoffs. And yesterday was another great story; fell behind early, came back to win in Oakland.

Today my staff is gathered around. They rigged up a way that we can actually listen to the game in the office, and we have a feeling they are going to come back today.

We are also proud and we are here today to talk about something that we in Minnesota are proud of, and that is a Minnesota company called Minnesota Mining and Manufacturing, 3M better known, because they are celebrating 100 years of innovation, and it really is one of the most innovative companies.

Several years ago we had one of their researchers come down to Rochester, Minnesota. He gave a speech, and he said something pretty profound. He said that he is talking about basic research, and he said if we knew what we were doing, it would not be research. And there is no other company that I know of that has done so much in terms of developing new products, because many people think of 3M, and they think of Scotch tape or they think of Post-It notes, but truthfully, it started 100 years ago making sandpaper, and now they are a \$1 billion pharmaceutical company.

They are involved in all kinds of things from health care to industrial products, consumer and office products, electrocommunication products and specialty material. They operate in

more than 60 countries. They have 37 international companies within the operation. They have 32 laboratories, and I think last year they were awarded 501 patents. It is an amazing story of innovation, and let me just share one quote, and then I want to yield back to my colleague.

One of their first presidents was a gentleman by the name of William McKnight, and he is the one who ignited the whole notion of innovation and research, but he said, "This higher good, people, leave them alone. If you put fences around people, you get sheep. Give people the room that they need." And he did and built an amazing company and also created an amazing foundation which serves the people of the Upper Midwest and the world even today.

I yield back to my colleague from Minnesota.

Mr. KENNEDY of Minnesota. Mr. Speaker, I thank my colleague for the time, and 3M is certainly one of the jewels of Minnesota, a wonderful company that, as my colleague described, very capably innovates beyond the scale of just about any other company in the world, and they bring out new products all the time that are solving problems that people face.

I had an opportunity just on the energy issues to sit and listen to some of their ideas for how we can be more energy-efficient, whether it be transmitting energy across electric lines, whether it be making the weight of our cars lighter so they can have the same strength but still use less gas. The number of ideas and innovation that comes out of 3M has been awesome, and we are proud to have them in our State.

I am very proud that in my district I have three plants in Hutchinson and New Ulm and Fairmont. I had the opportunity to visit them. They have got great, wonderful workers, and they have got wonderful workers throughout the company. They treat their workers very well, and we are certainly proud of that.

As part of this 100-year celebration, they are going to be here tomorrow in the Cannon Caucus Room, number 345, from 8:30 to 10:00, and I am proud, to be an American enterprise showcase of their technologies, and we encourage all of our Members to come and see the great things that 3M does.

Mr. GUTKNECHT. Mr. Speaker, that is tomorrow in 345 Cannon House Office Building from 8:30 to 12:30. Snacks will be served. It will be a great time.

THE NATION'S ECONOMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from the District of Columbia (Ms. NORTON) is recognized for 5 minutes.

Ms. NORTON. Mr. Speaker, the House has taken little note of what is happening to the economy. Millions of Americans, however, are clamoring for
